

### Phase 3 - How to integrate and bring back Hygiene

1. Rise above conflicts with colleges and come to mutually agreeable professional judgement.
2. Meet with each Hygienist and agree on returning and then sign off on their training for new way of working.
3. Review the Practice Playbook and Covid-19 screening process and Safety Guide and have Hygienists sign off.
4. Agree on PPE they will be provided and when it is required to wear.
5. Make sure they know and have had time to learn how to don and doff PPE properly.
6. Bring back 1 at a time until full schedule and add more as allowed while maintaining social distancing.
7. Review operatory management and air exchange and high volume suction.
8. Stagger appointment times for patient flow.
9. Allow 15 minutes between appointments for aerosol settling.
10. Make sure patients have pre-procedural rinse.

\*\*touch base and meet weekly to review how it is going with patient confidence and communication.
